Weekly Progress Report (Week 2)

<109>

Sprint Review:

Status of the current sprint (leave empty for sprint 0)

Note: Use Item No. for non-user story work like infrastructure set-up.

ITEM001					

Individual Contributions:

Please provide 1-2 sentences to describe the contributions of each team member during the past week.

<Ousman>:

    Finished UML diagrams.

<Dylan>:

    Finished User stories.

<Maddie>:

    Finished UI Sketches.

<Hector>:

    Finished Typescript classes and interfaces.

Sprint Retrospective:

Please answer the below questions in 1-2 sentences (use more of something really went wrong).

What went well in the previous sprint?

        Everybody participated and collaborated their thoughts on the TypeScript classes and interfaces, as well as the UML diagrams.

What obstacles were encountered in the previous sprint?

        No issues and no blockers so far.

What can we improve in the next sprint?

        Everyone attended and collaborated. For our next spring we need to get our repo initialized and start working on implementing user stories for the project.

Sprint Planning:

Plan for next sprint:

        We do not have any user stories set up yet, but for next week we plan on finishing up the Phase B document. We need to implement the UML diagrams and finish up our user stories and UI sketches. Dylan is in charge of user stories, Maddie is in charge of UI Sketches, and Hector and Ousman are in charge of UML diagrams, Classes and Interfaces. We all have rough drafts of this, we just need to have published ones for our next meeting and we should be all set for phase b.
